This survey is in the best interest of the patients cared for in the Southwest Ohio Region, the 2022 ED Capabilities Survey questions are geared to summarize full service hospital Emergency Department's capability to treat and admit specific prehospital patient emergencies. This effort is to solely supply the EMS provider with important information that can be used in the appropriate hospital triage of their patients.

This information is self reported and NOT verified.

Each EMS service with a Free Standing Emergency Department should have a specific protocol as to what patients should be triaged to the free standing ED.
