Appendix F: MCI protocol	Mack/Butcher	Aug 26
Consistent pediatric vital sign charts throughout	Crank	Aug 26
Update pediatric dosing chart	Crank/Barrett	Aug 26

## ADMINISTRATIVE

## NEW PROTOCOLS

Assault/Crime Scene/Trafficking – No update, still working on changes.

## PROTOCOL UPDATES/REVISIONS

M419 Sepsis – No report.

**S505 Prehospital Pain Management** – Added Pain score with standard pain scale. Made changes to mild pain- Remove brand names if possible. Would like to discuss including Tylenol administration for moderate or severe if patient can tolerate. Changed normal saline to crystalloid. Remove G add (capnography) to the end of F. Should vital signs be included or added to SB 200. Should add note Ketamine dosing is based on IDEAL body weight not actual. Discussion on whether we should block dose Ketamine rather than weight-based calculations. –Will work on this and bring back.

## PROTOCOL REVIEWS

**A106 Do Not Resuscitate Orders in the Field** – No report.

**A110 Highly Infectious Disease Transport** – No report.

**SB200 Clinical Practice Standards** –Will reevaluate SB200 definition of what is a patient- compared to law. Discussion of how dispositions were omitted, should be department specific.

**SB??? Refusal of Treatment and/or Transport** – Refusals made as a standalone protocol. Will add note about school bus driver, teacher, MCI situation.

**M404 Congestive Heart Failure** – No report.

**M406 Hyper/Hypoglycemia** – Should we lower the glucose level for hypoglycemia to 60? Should it match the ADA? This would maybe help with the dextrose shortage. Can add language as well about signs and symptoms, glucometer reading low etc. Approved to move to 60. Preference changed to D10.

**M408 Restraint Protocol** – Please review changes. Will review next meeting. Please bring suggestions and edits.

**M409 Allergic Reaction** – No report.

**M417 Adrenal Insufficiency** – No report.

**P608 Pediatric Hypoglycemia and Hyperglycemia** - mirrored adult to change preference to D10.

**P617 Pediatric Psychiatric Protocol** – No report, awaiting outcome of adult version.

**P618 Pediatric Restraint Protocol** – No report, awaiting outcome of adult version.

**T703 Emergency Use of Central Access Device (CVAD) and Fistula (Johann)** – No report.

**Appendix F: MCI protocol** – Terminology should be for scalable or massive incident, 2 hours vs 2 weeks. Remove large bore – just include needle decompression devices.

**Appendix G: Jump S.T.A.R.T (Rapid Pediatric Triage System)** – No report.

## **NEW BUSINESS**

CCHMC – please review pediatric dosing chart, will need to add solumedrol and push dose epi. Last meeting for new business unless something urgent comes up. Will need approvals and final versions for August and September meetings.

## **NEXT MEETING**

**August 26, 2022, at Local 48 beginning at 0900.**

**Future Meeting Dates –September 30 (Scarlet Oaks)**
